I have a 1999 50 hp
mercury bigfoot 4
stroke and i believe it
is having fuel
problems.while
boating saturday the
rpms suddenly

Dropped from 5100
to 3500 and remains
this way. I checked all
the spark plugs they
look great, I replaced
fuel filter. The boat
will start if I give it
throttle in N but as
soon as I begin to
return towards idle it
will die. Normally this
engine runs
great, could this be a
fuel pump issue.
