Management Accounting 2nd edition has been revised in response to changes in the global business environment. Unbridled access to information, intense competition and ongoing challenges in the corporate world have meant that cost accounting has become an increasingly important tool for managers and accountants alike. Most textbooks focus on content knowledge and then expect students to ?magically? demonstrate skills such as decision–making and critical thinking. As many students fail to recognise the assumptions, limitations, behavioural implications and qualitative factors that influence managerial decision–making, this text will better prepare students for professional success by bridging the gaps between knowledge, skills and abilities. The textbook is written in a style that is accessible to students and includes chapter scene setters, realistic illustrative examples, self–study problems and unique problem material structured to encourage students to think about accounting problems and problem–solving more complexly.

Great Expectations is the thirteenth novel by Charles Dickens and his penultimate completed novel, which depicts the education of an orphan nicknamed Pip. It is Dickens's second novel, after David Copperfield, to be fully narrated in the first person. The moral theme of Great Expectations is quite simple: affection, loyalty, and conscience are more important than social advancement, wealth, and class.

Illustrations and examples, at appropriate places, have been given. Readers who have not made a special study of any science subject will have also be able to grasp the definitions. Important scientific charts, tables, constants, conversion terms, etc., have been included as appendices to make this dictionary more useful.
