On our MSc in Digital Audio Engineering, you will explore the varied uses of technology in the delivery and creation of digital audio systems. With access to many useful resources, including both hardware and software, you will be able to develop real-world technical expertise to design, develop and operate a range of innovative solutions.

MSc Digital Audio Engineering | University of West London

A DAC, or Digital to Analogue Converter, is a unit which converts a digital audio signal, such as that from a CD player, television or computer, into an analogue one for connection to a standard amplifier. Although these are built into nearly all audio equipment, a separate, dedicated unit improves sound quality emphatically.
