Poverty research and the social sciences

Recent attempts across the social sciences have sought to change that by conceiving of poverty in relational terms, focusing primarily on the social, economic and political relationships between the poor and powerful others (Mosse, 2010; Elwood et al., 2017). Relational poverty analysis posits that this complex web of relationships produces poverty and makes it persist for particular groups.

Towards a Relational Approach to Poverty in Social Work ...

Her main argument in the text is that poverty knowledge was initially understood through the use of macro-explanations, with a focus on the economic and social structures that affect poverty, but over the course of the twentieth century, social scientists moved towards an understanding of poverty knowledge in terms of micro-explanations, with a focus on the individual as the cause and solution of poverty.
