Bronwar and Caitlin, the main initiates in the story, find themselves experiencing the ancient, spiritual wisdom of many cultures as they physically, spiritually, and emotionally travel to sacred sites that have existed from time immemorial upon the Earth. Through this journey, they explore what spiritual concepts mean to the growth of humanity and to

This interdisciplinary volume of essays examines the real and imagined role of Classical and Celtic influence in the history of British identity formation, from late antiquity to the present day. In so doing, it makes the case for increased collaboration between the fields of Classical reception and Celtic studies, and opens up new avenues of investigation into the categories Celtic and Classical, which are presented as fundamentally interlinked and frequently interdependent. In a series of chronologically arranged chapters, beginning with the post-Roman Britons and ending with the 2016 Brexit referendum, it draws attention to the constructed and historically contingent nature of the Classical and the Celtic,

and explores how notions related to both categories have been continuously combined and contrasted with one another in relation to British identities. Britishness is revealed as a site of significant Celtic-Classical cross-pollination, and a context in which received ideas about Celts, Romans, and Britons can be fruitfully reconsidered, subverted, and reformulated. Responding to important scholarly questions that are best addressed by this interdisciplinary approach, and extending the existing literature on Classical reception and national identity by treating the Celtic as an equally relevant tradition, the volume creates a new and exciting dialogue between subjects that all too often are treated in isolation, and sets the foundations for future cross-disciplinary conversations.

From generation to generation, people experience their landscapes differently. Humans depend on their natural environment: it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities (such as droughts, famines, floods and landslides) need to be appeased. We presume that, in many societies, lakes, rivers, rocks, mountains, caves and groves were considered sacred. Individual sites and entire landscapes are often associated with divine actions, mythical heroes and etiological myths. Throughout human history, people have also felt the need to monumentalize their sacred landscape. But this is where the similarities end as different societies had very different understandings, beliefs and practices. The aim of this new thematic appraisal is to scrutinize carefully our

evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality, textuality and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were "rewritten", adapted and redefined in the course of time to suit new cultural, political and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed and monumentalized – especially the colossal investments in monumental

architecture we see in certain socio-historic contexts or the creation of an alternative humanmade, seemingly "non-natural" landscape, with perfectly astronomically aligned buildings that define a cosmological order? Sacred Landscapes therefore aims to analyze the complex links between landscape, "religiosity" and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic, holistic, contextual and historical perspective.

Fierce warriors and skilled craftsmen, the Celts were famous throughout the Ancient Mediterranean World. They were the archetypal barbarians from the north and were feared by both Greeks and Romans. For two and a half thousand years they

Britain And Ireland have continued to fascinate those who have come into contact with them, yet their origins have remained a mystery and even today are the subject of heated debate among historians and archaeologists. Barry Cunliffe's classic study of the ancient Celtic world was first published in 1997. Since then huge advances have taken place in our knowledge: new finds, new ways of using DNA records to understand Celtic origins, new ideas about the proto-urban nature of early chieftains' strongholds. All these developments are part of this fully updated, and completely redesigned edition. Cunliffe explores the archaeological reality of these bold warriors and skilled craftsmen of barbarian Europe who inspired fear in both the Greeks and the Romans. He investigates the texts of the classical writers and contrasts their view of the Celts with

current archaeological findings. Tracing the emergence of chiefdoms and the fifth- to third-century migrations as far as Bosnia and the Czech Republic, he assesses the disparity between the traditional story and the most recent historical and archaeological evidence on the Celts. Other aspects of Celtic identity such as the cultural diversity of the tribes, their social and religious systems, art, language and law, are also examined. From the picture that emerges, we are - crucially - able to distinguish between the original Celts, and those tribes which were "Celtized," giving us an invaluable insight into the true identity of this ancient people.

□A lively popular history of an oft-overlooked element in the development of human society□ (Library Journal)□walls□and a haunting and eye-opening saga that reveals a startling link between what we build and how we live. With esteemed historian David Frye as our raconteur-guide in Walls, which Publishers Weekly praises as □informative, relevant, and thought-provoking,□ we journey back to a time before barriers of brick and stone even existed□to an era in which nomadic tribes vied for scarce resources, and each man was bred to a life of struggle. Ultimately, those same men would create edifices of mud, brick, and stone, and with them effectively

divide humanity: on one side were those the walls protected; on the other, those the walls kept out. The stars of this narrative are the walls themselves—rising up in places as ancient and exotic as Mesopotamia, Babylon, Greece, China, Rome, Mongolia, Afghanistan, the lower Mississippi, and even Central America. As we journey across time and place, we discover a hidden, thousand-mile-long wall in Asia's steppes; learn of bizarre Spartan rituals; watch Mongol chieftains lead their miles-long hordes; witness the epic siege of Constantinople; chill at the fate of French explorers; marvel at the folly of the Maginot Line; tense at the gathering crisis in Cold War Berlin; gape at Hollywood's gated royalty; and contemplate the wall mania of our own era. Hailed by Kirkus Reviews as "provocative, well-written, and" with walls rising
